- Knowledge of agricultural/related databases.
- Openness to travel.
- Excellent research, documentation and communication skills.
- Highly motivated with the ability to multi-task and remain organized in a fast-paced environment .

### **About Arcus Policy Research**

Arcus Policy Research conducts rigorous research in order to shape policy dialogues and design high-impact interventions to solve pertinent issues in agricultural sector across domains including gender, climate-change, food security, and health. Our research is based on scientific methods and is mostly available in public domain post review by peers/domain experts. Deploying both qualitative and quantitative research methods, we make use of secondary data, market assessments and data collected through our in-house surveys. We serve a range of clients including governments, foundations, multi-laterals, NGOs and other agencies.
